

chantry retro sharpener

RETRO CHANTRY
SHARPENER
560

available in white or chrome

A classic reborn.

Inspired by designs of the Art Nouveau and Art Deco movements of the early 20th century we have faithfully recreated the shape of the original Chantry Knife Sharpener.

It reproduces the action of a butcher's steel and automatically ensures the correct edge angle is applied equally to both sides of the blade. The steels revolve under tension and do not wear away the blade.

Suitable for knives with plain or serrated edges. No batteries are required and the steels are easily replaceable.

 Made in Sheffield.
